

CLAUDIA A. WEHRHAHN C.

SUMMARY

I am a highly creative and motivated statistician. I have 2+ years of experience leveraging data to help business decision making and 6+ years of experience researching data modeling strategies. I am a problem solver with deep statistical and machine learning knowledge and strong programming skills able to communicate, present findings, and prepare enlightening visualizations and reports. I am a fast-passed-learner excited about applying my data experience, statistical analysis knowledge, and diverse set of skills to deliver truly transformative solutions.

EXPERIENCE

HDI Seguros - Senior Actuary, Pricing

Santiago, Chile ♦ 2023 - Present

- Responsible for developing advanced data-based models for the company's main business area. One project involved a new pricing model that improved 5% accuracy. Another was a conversion rate model aimed to optimize margin. These projects involved deep data wrangling, descriptive analysis, and the use of machine learning models.
- Responsible for creating automated solutions for periodic tasks reducing time execution for up to 90%.
- Responsible for periodically update data visualizations of business guiding KPIs and provide data-based insights and recommendations for other areas in the company.

University of California, Santa Cruz - Visiting Assistant Professor

Santa Cruz, CA ♦ 2020 - 2022

- Taught 5+ undergraduate probability and statistical inference courses for students with different technical backgrounds and main responsible for the statistical consulting service that the Department of Statistics provides.
- Worked closely with the Water Department Director to develop and implement a predictive regression model to understand yearly accumulated stream flows from the San Lorenzo River. The results are considered for water policies in the city.
- Led a project to validate a new portable testing method for coronavirus disease, granted 25K USD. In this project, I creatively approached the problem from a wide range of perspectives to determine the most adequate and innovative technique.

University of California, Santa Cruz - Postdoctoral Scholar

Santa Cruz, CA ♦ 2017 - 2020

- Developed a novel model to describe higher than expected incidence rates and to identify clustering structures over a region to uncover potential environmental hazards leading to 1 published paper.
- Developed and executed a time-dynamic point process to describe geographical locations of individuals from drone-taken pictures. The results showed that Californians keep closer interpersonal space than stated by theory.

Santiago, Chile

EDUCATION

PhD in Statistics

Pontificia Universidad Católica de Chile

Santiago, Chile ♦ 2016

Master in Statistics

Pontificia Universidad Católica de Chile

Santiago, Chile ♦ 2011

SKILLS

- **Statistics:** regression/classification, clustering, GLM, GAM, Bayesian models, regression/classification trees, and many others
- **Programming:** Python, R (advanced), C, Fortran (intermediate)
- **Data set:** PL/SQL, SQL Developer, Excel
- **Visualization:** Power BI
- **Presentation:** R Markdown, LaTeX, Beamer, Office
- **Languages:** Spanish (native), English (fluent)

OTHER SKILLS

- Effective communicator
- Great organizational skills
- A team player and collaborator
- Love outdoor activities
